

CALIBRATION

To use this module, activate the GPS, be outdoors and have a low cloud cover. Do not move for several seconds after pressing "Push to init."

Move towards you and save your intermediate and final distance.

2S TIMING

* Athletes tab *

All athletes registered with their personal profile. You can change the name, avatar and delete & analyse sessions.

* Groupes tab *

Each group includes a list of athletes. You can change the order of the athletes, delete and add athletes.

BLUETOOTH CONNECTIVITY ISSUES

Make sure you have turned on Bluetooth on your device.

Make sure you are within 25 meters of the Bluetooth ST-BOX Prostart device.

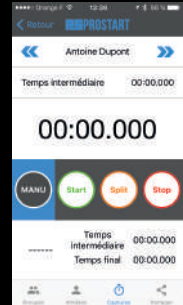

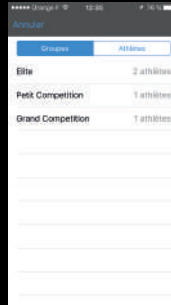

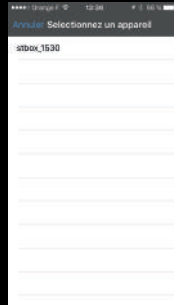

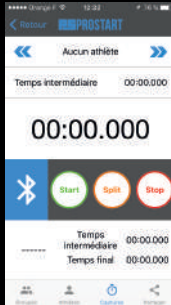

Make sure that you have powered the Bluetooth ST-BOX Prostart device.

Reboot your device and the Bluetooth box and try again.

To link the two elements, just press the Bluetooth logo in the Captures tab then select the Bluetooth Box appointed stbox_xxxx.

2S TIMING - NEXT PART

* Captures tab *

You can use this tab manually but also automatically by connecting to a PROTRAINING 2.0. To do this, connect your Bluetooth ST-BOX device, press the Bluetooth logo then select your device [stbox_XXXX].

By pressing the MANU button and if you are connected to a Prostart starting system, you run a start.

By pressing "No athlete", you can select a group or an athlete to back up all data automatically.

* Share tab *

To export the data to Excel files [.xls], simply press on the paper clip and select the group or the athlete you want to export.

You can send the data table by Message, Mail or even save it in your notes.
